github.com/brah14 | linkedin.com/in/wisdom-huno-tetteh-6aa8853ab | codealphapersonalportfolio.vercel.app

PROFILE

Frontend developer and Information Technology student building responsive web apps with React, TanStack and JavaScript, backed by Supabase and PostgreSQL. Shipped a live invoicing SaaS and an inventory management app, plus a booking platform with an admin panel. Completing a BSc in Information Technology and gaining hands-on experience through the CodeAlpha Frontend Development internship. Ready to deliver clean, responsive interfaces and REST API integrations as part of Microvista Technologies' frontend team.

SKILLS

- **Languages & UI:** HTML5, CSS3, JavaScript (ES6+), React, responsive design
- **Frameworks:** TanStack Router / Start, Vite
- **Data & Backend:** Supabase, PostgreSQL, REST APIs
- **Tools & Deployment:** Git, GitHub, VS Code, Vercel, Netlify
- **Also familiar with:** Python, C++

FEATURED PROJECTS

Four projects built and deployed. Code at github.com/brah14; more at codealphapersonalportfolio.vercel.app.

- **Cove: Inventory for Small Shops.** Full-stack inventory app that lets independent shops track products, sales, low stock, customers and purchase orders, with sign-up and sign-in so each shop gets its own ledger. Deployed on Vercel. View app · Code
- **Invoisory: Invoice Generator SaaS.** Invoice generator web app built on TanStack Start, deployed on Vercel with a custom domain (invoisory.me) and GitHub-based continuous deployment. View app
- **Huno_Cutz: Barbershop Booking Platform.** Appointment booking website built with Vite and TanStack Router on a Supabase backend, with an admin panel for managing bookings.
- **Shardon Cosmetics: E-commerce Storefront.** Cosmetics storefront built on Lovable for a friend's brand, taken from design through storefront review.

EXPERIENCE

Frontend Development Intern CodeAlpha Nov 2026

- Building frontend projects in HTML, CSS and JavaScript as part of a structured internship, including an interactive calculator and an image gallery.
- Publishing each completed task to its own GitHub repository for review.
